***Election/Restrictions***

A telephone call was made to Masako Ando on March 19, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made, as the examiner was unable to reach Masako Ando.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 are drawn to a sequence control circuit, classified in class 712, subclass 245.
- II. Claim 9, is drawn to a semiconductor testing apparatus with a pattern generating circuit, classified in class 714, subclass 738.

Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a sequence control circuit can be used in semiconductor testing apparatus along with other aspects such as pattern memory, pattern generators and determination circuitry. The subcombination has separate utility in circuitry having nothing to do with testing such as instruction processing in various types of circuitry.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

The examiner would also like to point out that with or without the pre-amendment requested, a restriction would be proper as the preexisting claim 9 was not in proper form. Also, the examiner performing the interview only indicated that the claims would be in condition for examination, not that they would be in condition for allowance, as a search <sup>has</sup> ~~as~~ not yet been conducted on the substance of the claims.
